Professional Summary:

Network Engineer with experience at Airtel, specializing in enterprise networking, cloud infrastructure, and DevOps fundamentals. Strong expertise in networking concepts. Proficient in AWS cloud services with hands-on experience in EC2, VPC, IAM, S3, Load Balancers, and CloudWatch, along with working knowledge of GCP and Microsoft Azure. Familiar with DevOps tools and practices such as Linux administration, shell scripting, CI/CD concepts, Infrastructure as Code, Docker, and monitoring. Proven ability to support high-availability, scalable systems and collaborate across teams. Actively seeking Cloud Engineer or DevOps Engineer roles.

EDUCATION:

Bachelor of Technology - Electronics and Communication, BK Birla Institute of Engineering and Technology, 8.6 CGPA :2018 - 2022

12th - Board of Secondary Education, Rajasthan, 85.60%

10th - Central Board of Secondary Education, 10 CGPA

TECHNICAL SKILLS:

CI/CD Tool	Jenkins, Azure DevOps
Build Tool	Maven, NodeJS(Basics)
Container Management Tool	Kubernetes
Version Control	Azure Repos, Git, GitHub
IAC Tools	Ansible & Terraform
Security Tools	OWASP Dependency Check, TRIVY, Anchore, OWASP ZAP
Containerization Tool	Docker

Cloud Platform	AWS, Azure, GCP Cloud
Ticketing Tool	JIRA
Artifact Management Tool	Nexus3 & Azure Artifacts
Programming & Scripting:	Shell Scripting, Python
Code quality checkTool	Sonarqube
Monitoring	Prometheus, Grafana, ELK Stack, AWS CloudWatch
Operating System	Windows, Linux

Professional Overview :

- Implemented and managed AWS cloud infrastructure using services such as EC2, S3, RDS, VPC, IAM, ELB, Auto Scaling, CloudWatch, CloudTrail, and SNS.
- Configured Auto Scaling Groups integrated with Elastic Load Balancers to dynamically scale EC2 instances based on traffic and improve cost efficiency.
- Designed and implemented custom VPC architectures with CIDR block planning, ensuring secure and scalable networking environments.
- Established VPC peering connections and configured VPN connectivity to securely integrate on-premises infrastructure with AWS.
- Managed IAM users, groups, roles, and policies to enforce fine-grained access control and security best practices.
- Configured and managed S3 buckets, implemented bucket policies, and automated data operations using AWS CLI.
- Deployed and managed Amazon RDS (MySQL) instances with Multi-AZ configurations to ensure high availability and automated backups.
- Utilized Git and GitHub for version control, including branching strategies, tagging, and access management.
- Developed infrastructure using Terraform, including module creation, state management, and version locking.
- Implemented CI/CD pipelines using Jenkins and GitLab to automate build and deployment processes, significantly reducing deployment times through automation and pipeline optimization.
- Containerized applications using Docker for consistent deployment across environments.
- Monitored system performance and logs using AWS CloudWatch.

WORK EXPERIENCE :

NOC Network Engineer - Airtel

Sep 2025 – Present, Gurugram, India

- Designing Complex MPLS Networks for Various B2B Customers of Airtel mostly Banking
- Optimized Design Task which led to improvement in Designing Similar Network Requirements
